

AGRIVET – a different dimension to the Livestock Research & Advisory

Partnering for Future...

The success story of Agrivet lies in its origin. The gap in the demand and supply of knowledge to the medium and small-scale investors in the field of animal husbandry in India was aptly identified by Dr Shivaji Dey, a leading Indian consultant in the field of livestock and aqua nutrition business. Dr Shivaji conceptualized the idea of forming a consortium of animal husbandry professionals to extend need-based and unbiased technical consultancy services to the afore-mentioned small and medium scale operations to facilitate their infrastructure development and become contemporary in product and services offerings. His vision got bolstered with the joining of Dr. Anirvid Sarkar, established veterinarian and animal genetics professional, and Dr. Amrita Kumar Dhara, an expert in the field of poultry breeding, health, and hatchery management.

Within few years of inception, Agrivet established itself as a reputed livestock advisory organization, and realized the need to add research along with its established livestock advisory profile. Dr Sudipto Halder, a premier academician and researcher in the field of Animal Nutrition, joined Agrivet in 2015 and Agrivet Research Center was established. The Research division of Agrivet got further reinforced with Dr Halder taking the research activities to a level contemporary to international standards.

Delivering Excellence...

With Advisory and Research established in their solution repertoire, Agrivet decided to start their Laboratory services. On reaching successful 10 years of journey, they ventured into learning school for Livestock Industry, which is one of its kind skill development facilities for learners and refreshers from India and neighboring countries.

AGRIVET RESEARCH

Agrivet has developed itself as only Independent Private Livestock Contract Research service provider in Indian subcontinent and South-East Asia with 100+ Indian and Global clients. At **Agrivet Research Center**, basic and applied research is carried out for benefiting the livestock fraternity across the globe.
