

Dr. AgriVet Livestock Healthcare at fingertips

The on-farm health care and management service in livestock industry is still at a nascent stage. The availability of experienced veterinary advisory at local level remains a key cause of concern for the industry. It is also critical to ensure a quick turnaround time to address issues in livestock farm.

Dr. AgriVet is an Online Digital Platform that connects the grass root level farmers with the veterinarians with an objective to provide effective and scientific technical assistance for Poultry, Dairy, Aqua, Companion Animals and other livestock health care and management.

It is **India's First Online Livestock Health Care Advisory Platform** – the first of its kind to serve the Livestock Farmers. Technology driven, Non-Physical, Real-Time, Expert Health Care advisory for Livestock farmers of urban and rural beneficiaries and the farmers receive these specialty services at **NO COST**. Along with its real time response, the uniqueness of the platform is that it provides a direct one to one interactive medium of an expert consultation. The features also include micro-level disease information management on Livestock business & Livestock health.

Dr. AgriVet is mandated to provide healthcare support to approximately 20 million Livestock Farmers (Including Poultry) in India covering healthcare remedy to around 1400 million livestock population including Poultry.
